Narrative Label Evaluation Guidelines

1. Objective

The purpose of this evaluation is to assess how accurately narrative labels represent the central political narrative expressed in Greek parliamentary discourse.

You will evaluate **100 Greek parliamentary paragraphs**, each accompanied by three candidate narrative labels in English.

Your task is to select **all labels that adequately represent the central political narrative** of each paragraph.

2. What Is a Political Narrative?

A political narrative is an interpretation of political events, actors, actions, or problems that conveys a particular political meaning.

It may involve attributing responsibility, explaining causes, criticizing political decisions, identifying institutional failures, or proposing solutions.

A political narrative is not simply the general topic of a paragraph. It reflects the political interpretation or argument being expressed.

3. Evaluation Criteria

Read each Greek paragraph carefully and evaluate the three candidate labels (A, B, and C) independently.

A label should be selected when it:

1. **Accurately represents** the political meaning of the paragraph.
2. **Captures a central narrative**, rather than a secondary detail or general topic.
3. **Is supported by the text**, without requiring external information or assumptions.
4. **Uses an appropriate level of abstraction**, avoiding excessively broad, vague, or unnecessarily specific descriptions.
5. **Is independently adequate**, meaning it could reasonably describe the paragraph's central political narrative on its own.

You are **not selecting the single best label**. Multiple labels may be appropriate.

4. Recording Your Answers

For each paragraph, enter one of the following values in the `selected_options` column:

Answer	Meaning
A	Only A is adequate
B	Only B is adequate
C	Only C is adequate
A,B	Both A and B are adequate
A,C	Both A and C are adequate
B,C	Both B and C are adequate
A,B,C	All three labels are adequate
D	None of the labels is adequate

Important:

- Select all labels that independently satisfy the evaluation criteria.
- Select **D (None of the above)** only when none of A, B, or C adequately represents the central narrative.
- D does not mean that the paragraph contains no political narrative.
- Never combine D with another option.
- Do not leave any paragraph unanswered.

5. General Instructions

- Base your evaluation exclusively on the paragraph's content.
- Do not select labels merely because they refer to the same topic or share keywords with the paragraph.
- Do not favor labels based on their length, wording, or position.

- Do not attempt to identify which system generated each label.
- Complete the evaluation independently, without discussing your answers with other evaluators.

The order of labels A, B, and C is randomized for each paragraph.

6. Submission

After evaluating all 100 paragraphs, check that every row contains a valid response in the `selected_options` column.

Save the completed file and return it to the research team.
